Product Introduction&
presentation

Product Introduction

48V低压裂相逆变器，是迈格瑞能专为北美市场设计，该产品已经通过了 UL 1741:2021, IEEE 1547.1, UL1699B, South Africa NRS097-2-1:2017 test certification; 可广泛应用于各种家庭储能应用环境，能够非常友好地与光伏，电池，柴油发电机进行协同工作。结合智能显示，使操作和维护更容易。

Product Features

- ✓ Support multi-machine parallel connection, the maximum parallel connection can reach 8;
- ✓ Single-machine load capacity 100A;
- ✓ Support 100% unbalanced load capacity;
- ✓ Compatible with lead-acid and lithium ion batteries ;
- ✓ Input power source priority can be set by users;

Product display

1.展示产品的尺寸：430*220*710 (WDH)

Product display

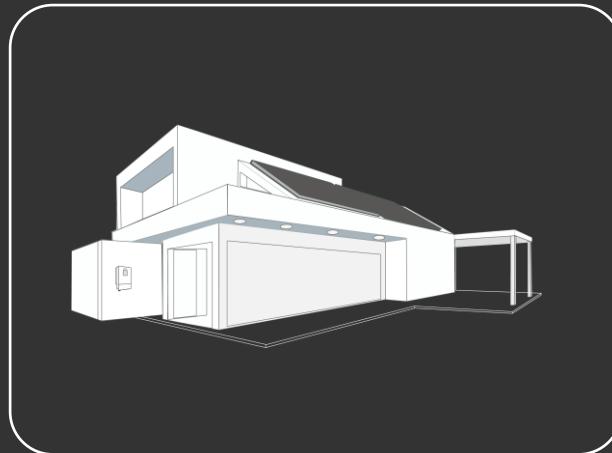

2.搭配人性化HMI操作界面,产品右侧为:PV switch,RSD Button开关, 方便操作

Product display

3. IP65/NEMA 3R防护等级设计，可在室内或室外安装；

4. 运行的环境温度：-25°C ~ 60°C；

-25°C

-60°C

Tools overview & Check accessories

Tools need when installing the three phase PV + ESS hybrid inverter

wire stripping pliers

electric drill

cross screwdriver

straight screwdriver

Manual crimping pliers

Tool knife

Product unpacking

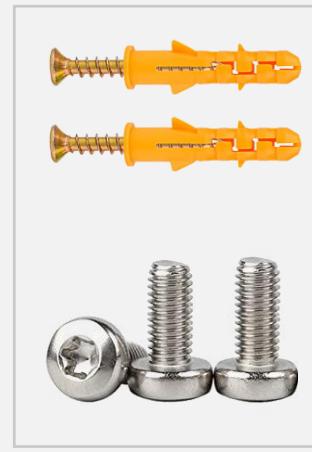

List of product accessories

Hybrid inverter

user 's manual

Expansion screws
&pan-head screws

Current
transformer*2

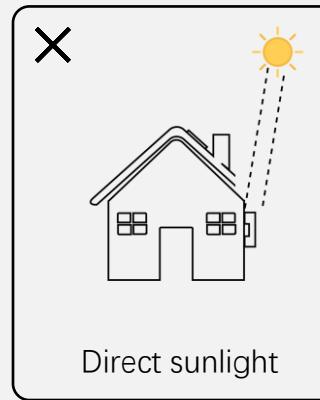

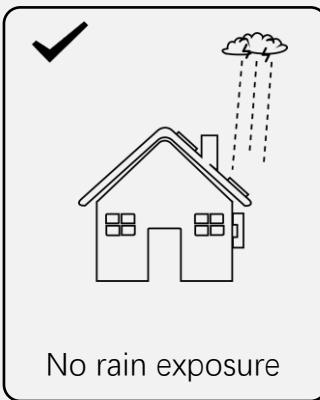

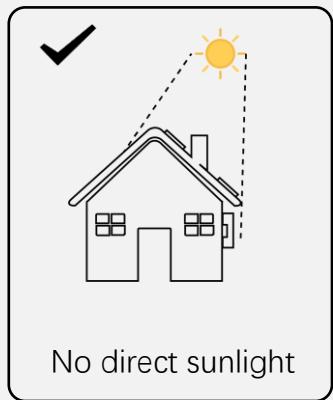

WiFi &GPRS
module (optional)

3

Wall-mounted bracket
installation

Installation Precaution

Please AVOID direct sunlight, rain exposure, snow laying up during installation and operation.

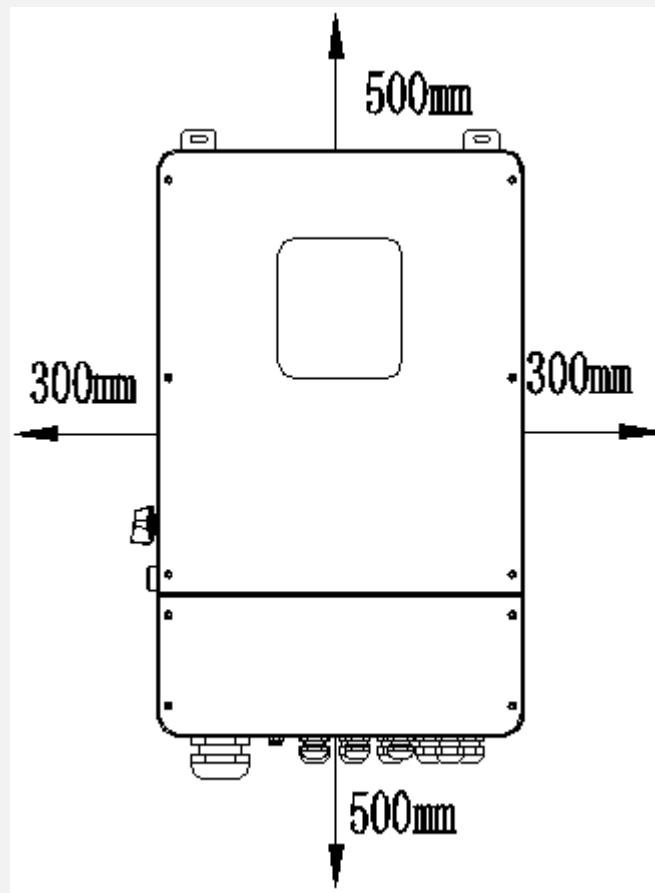

Installation environment requirements

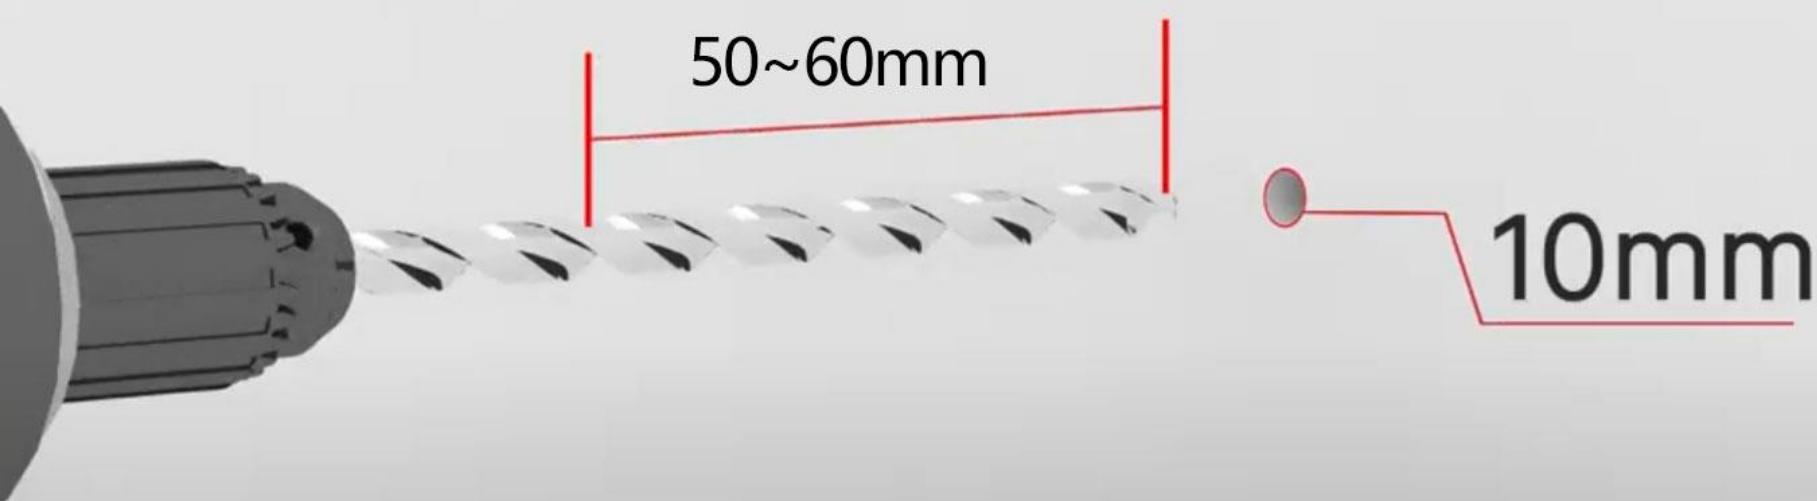

1. 挑选一个效果比较好的住宅，住宅中能看到有明显的负载，光伏，室内暖色灯光，
2. 给住宅一个全景然后再到墙面局部特写，

Installation environment requirements

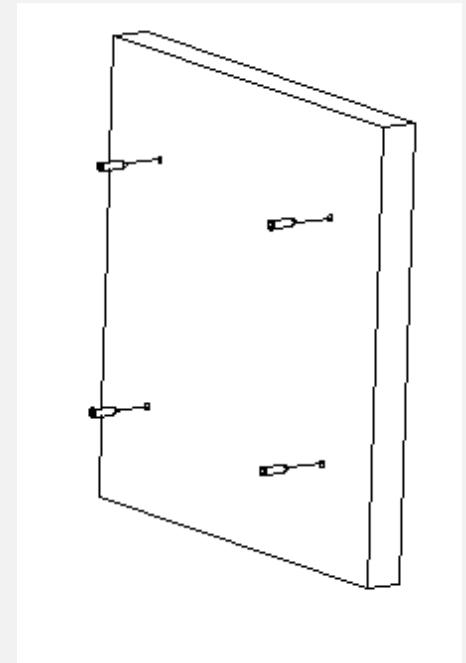

Installation environment requirements

Step 1: Drill 4 holes in the wall according to the following distance dimensions, 50~60mm depth. Then use a proper hammer to fit the expansion bolt into the holes.

Installation environment requirements

Step 2: Lift up the inverter and align the hole of the inverter with the expansion bolt, Fix the inverter on the wall.

Install the machine

Step 4: Remove the cover screws and remove the cover

4

PV connection

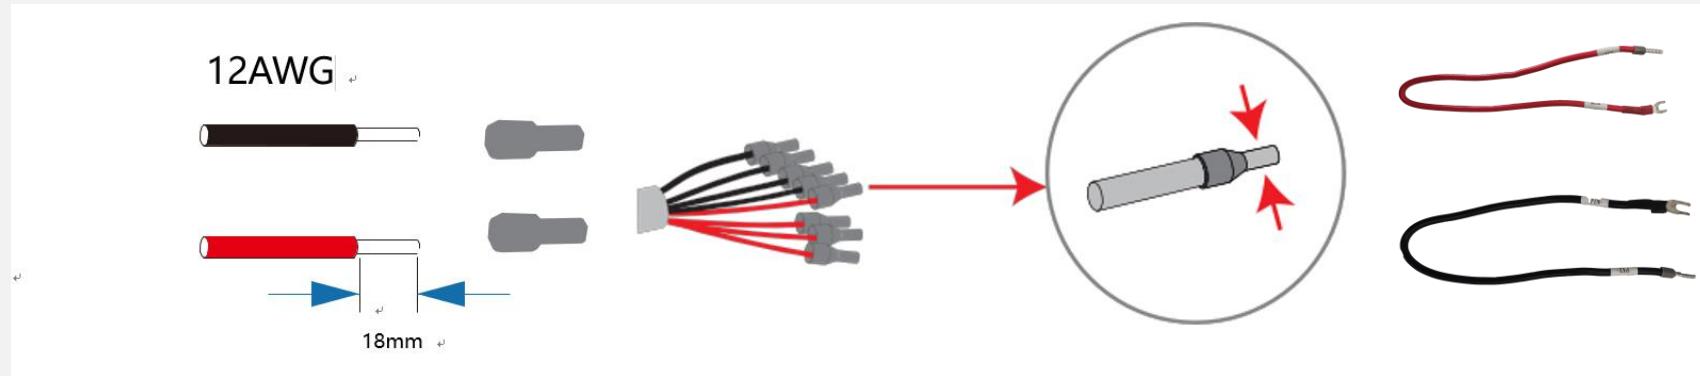

Accessories required for PV connection

PV module voltage is very high, please comply with electric safety rules when connecting.
Please do not make PV positive or negative ground!

Accessories required for PV connection

Step1. make wiring.

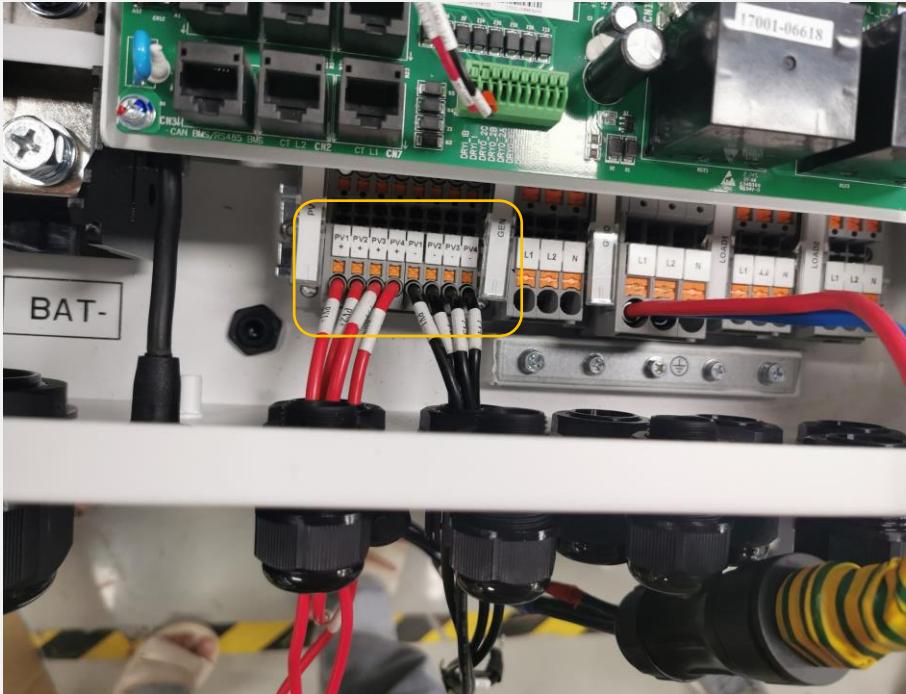

- 1.1 Choose the 12 AWG wire to connect with the cold-pressed terminal.
- 1.2 Remove 18mm of insulation from the end of wire.
- 1.3 Make 4 red pv+ wires and 4 black pv- wires respectively

Accessories required for PV connection

Step2. Rotate the pv+ and pv- waterproof terminals on the device

Install the machine

Step3. 将4根PV+线和4根PV-线缆通过PV+和PV-接口分别按照顺序接入PV端子排，另外一端连接至光伏。

PV connection process display

Connect the PV Modules

5

Grid connection

Accessories required for Grid connection

Step1. Check the grid voltage.

1.1 Check the grid voltage and compare with the permissive voltage range.

1.2 Disconnect the circuit board from all the phases and secure against re-connection.

Accessories required for Grid connection

Step2. Grid cables choose, 请参照以下提示选择合适的线缆

Model	R5KLNA	R6KLNA	R7K6LNA	R8KLNA
Cable	12AWG			10AWG

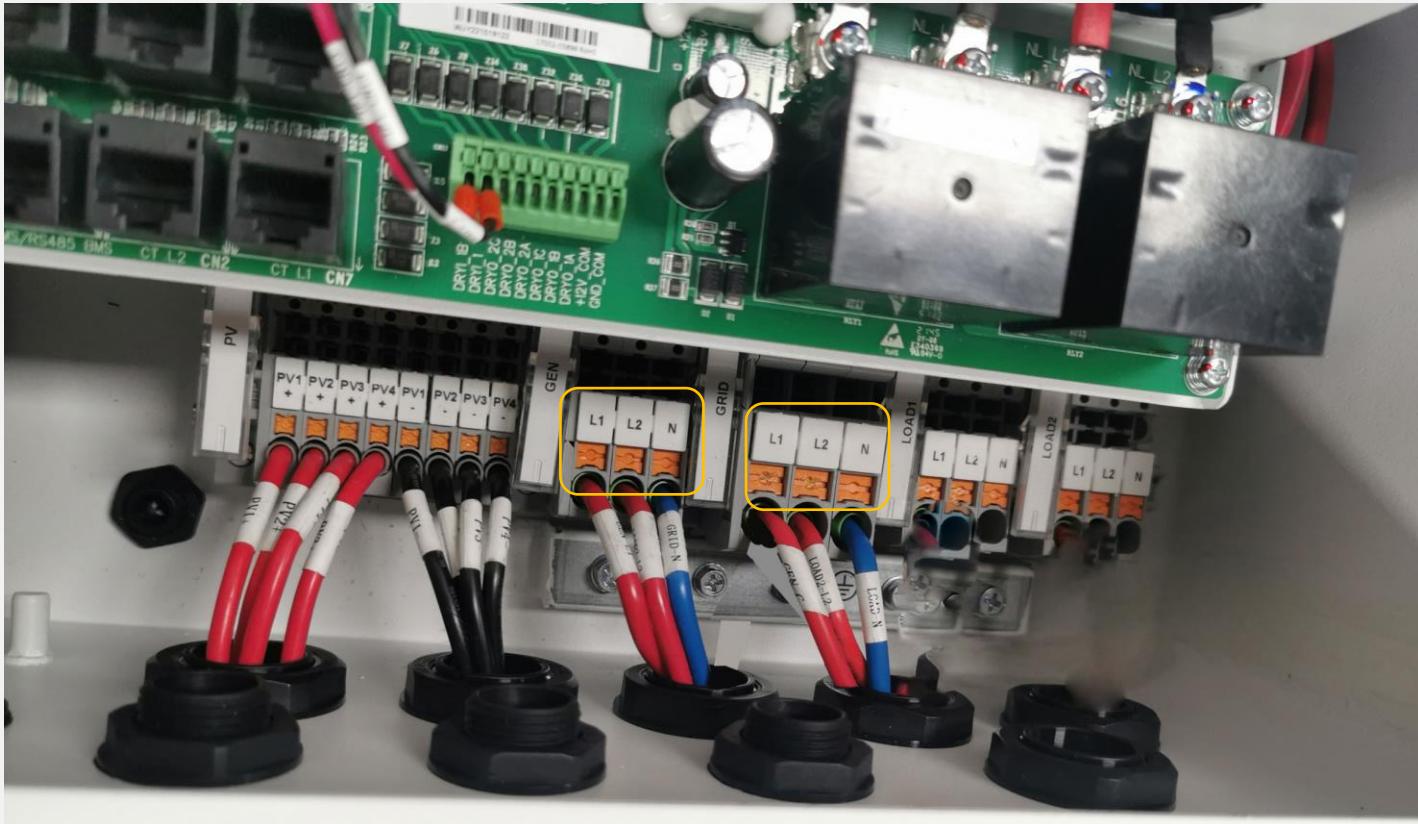

- 1.选择好适合的线缆后，使用附件箱中的针脚端子安装在线缆的一端；
2. 在线缆的另一端（冷压端子侧）移除18mm的绝缘层；
3. 分别制作2根红色的GEN火线，1根蓝色的GEN零线和2根红色的Grid火线，1根蓝色的Grid零线；

Connection steps

Step3. 分别旋转取下产品底部GEN和Grid的防水接口

Step4. 将GEN的2根火线和1根零线通过GEN端口按照顺序接入GEN端子排

Step5. 将Grid的2根火线和1根零线通过Grid端口按照顺序接入Grid N端子排

Connection steps

Step5. 将电缆的另外一端连接至配电箱

6

Back-up connection

Accessories required for Back-up connection

请根据产品型号选择合适的离网交流断路器

Model	R5KLNA	R6KLNA	R7K6LNA	R8KLNA
Micro-breaker	32A			40A

When using the off grid function, please add off grid AC breaker in off grid output cable to ensure safety.

The absence of AC breaker on back-up side will lead to inverter damage if an electrical short circuit happens on back-up side.

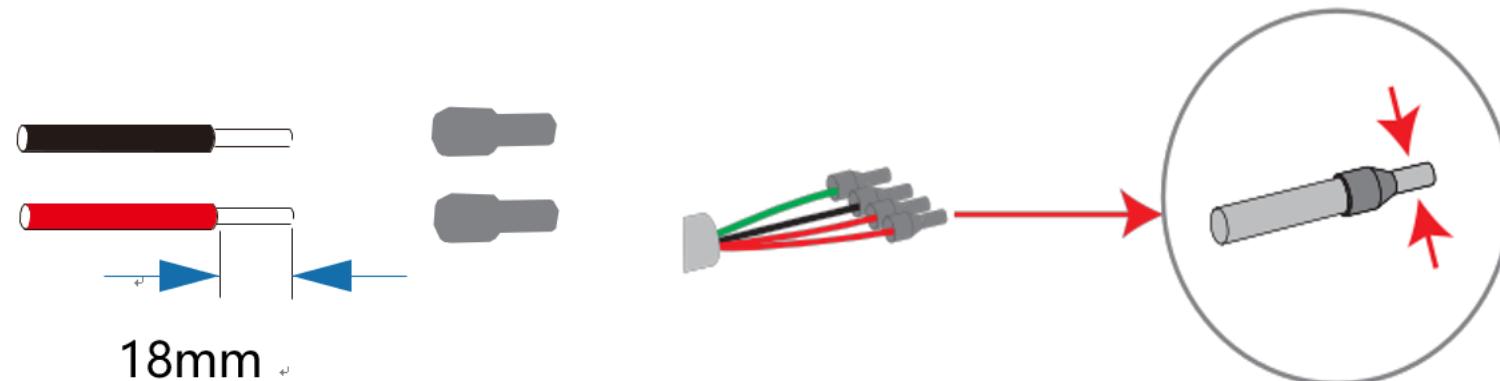

Connection steps

Step1. Make BACK-UP wires.

根据产品的型号选择合适的线缆进行制作

将线缆的一端移除18mm的绝缘层，并安装针脚端子。

Model	R5KLNA	R6KLNA	R7K6LNA	R8KLNA
Cable		12AWG		10AWG

Connection steps

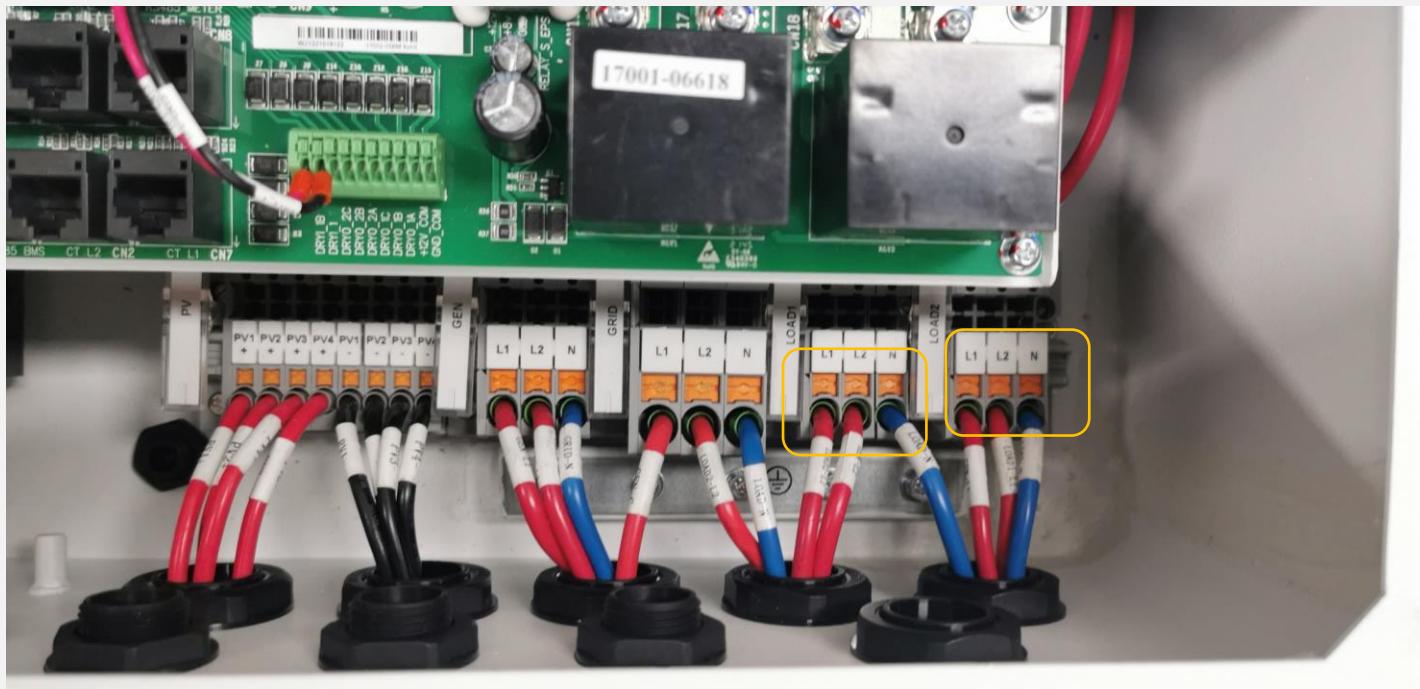

Step2.制作4根load火线和2根load零线

Connection steps

Step3. 分别旋转取下产品底部Load1和Load2的防水接口

Step4. 通过load1和load2接口分别接入2根火线和1根零线到load1和load2端子排。

Connection steps

Step5. 线缆另外一端连接至配电箱中的负载插排。

7

Battery connection

Connection steps

Step1. Before connecting to battery, please install a no-polarized DC breaker to make sure inverter can be securely disconnected during maintenance.

请根据产品型号选择合适的离网交流断路器

Model	R5KLNA	R6KLNA	R7K6LNA	R8KLNA
Current(A)	160A			250A

Before choosing battery, please note the maximum voltage of battery can not exceed 60V!
When using RS485 protocol, please note that PIN2 must be disconnected!

Connection steps

Step2: Making connecting cable

Choose the 2 AWG wire and strip the cable to 15mm. Select two O-terminals with an aperture of M8. Insert the stripping line into the O-terminal and clamp it with a crimping clamp.

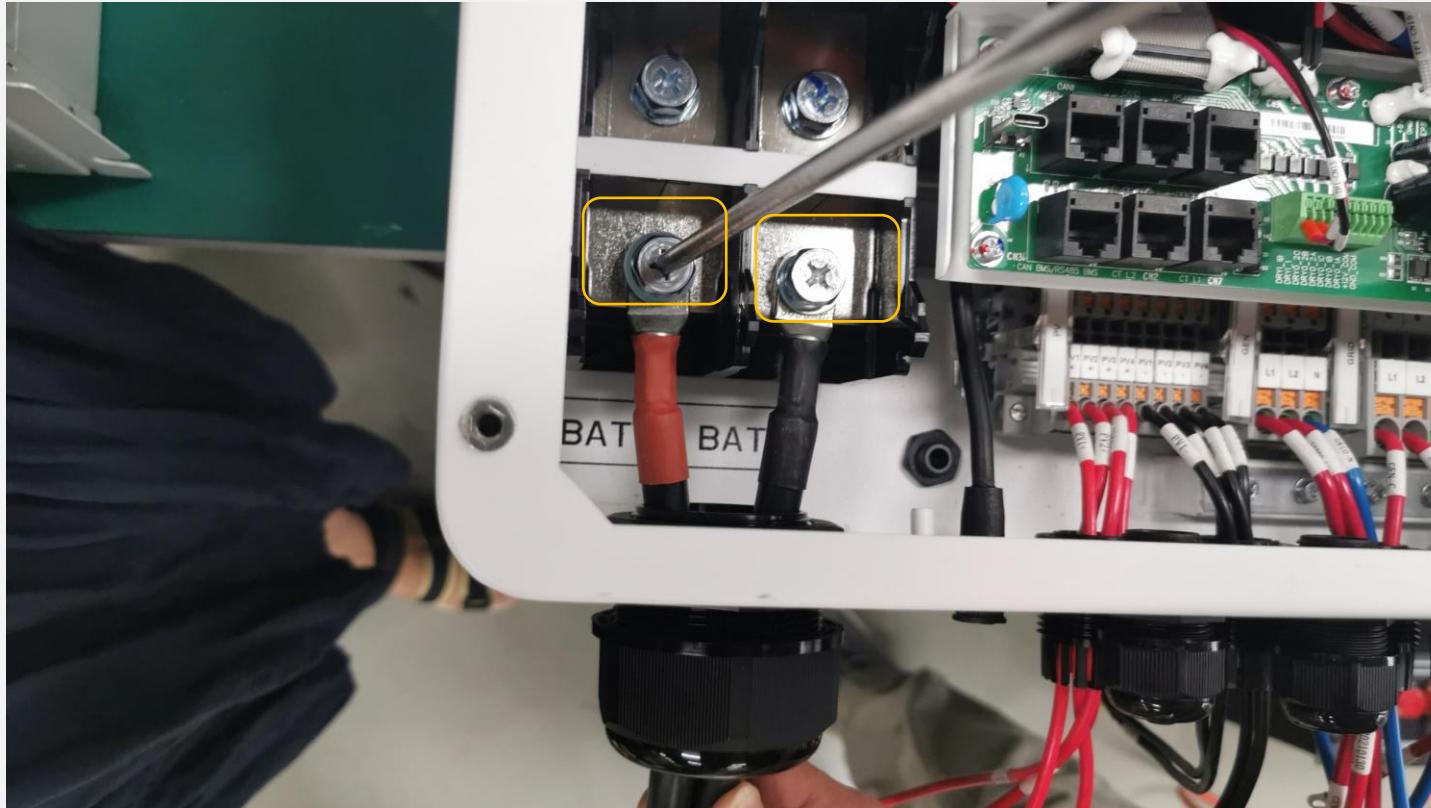

Connection steps

Step3:旋转取下产品底部BAT+和BAT-的防水接口

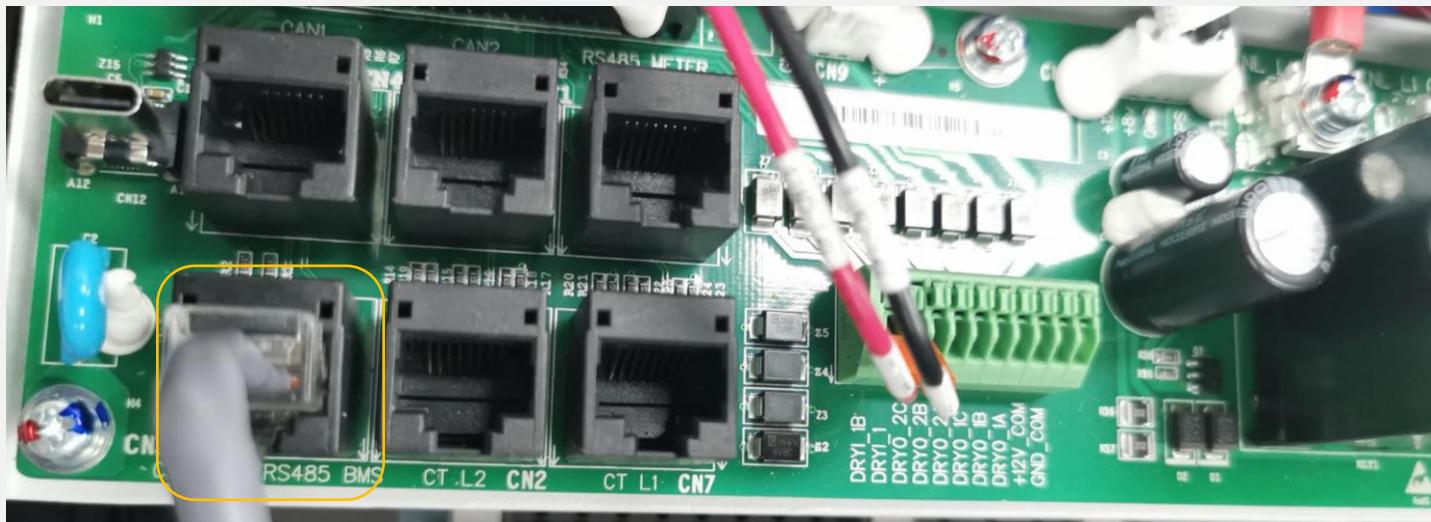

Step4:将电池线缆的B+和B-接头分别穿过BAT+和BAT-接口

Step5:用螺丝刀取下BAT+和BAT-的螺丝，将电池线缆接头对照安装，完成后扭紧螺丝进行固定。

Connection steps

Step6:连接BMS通信线缆

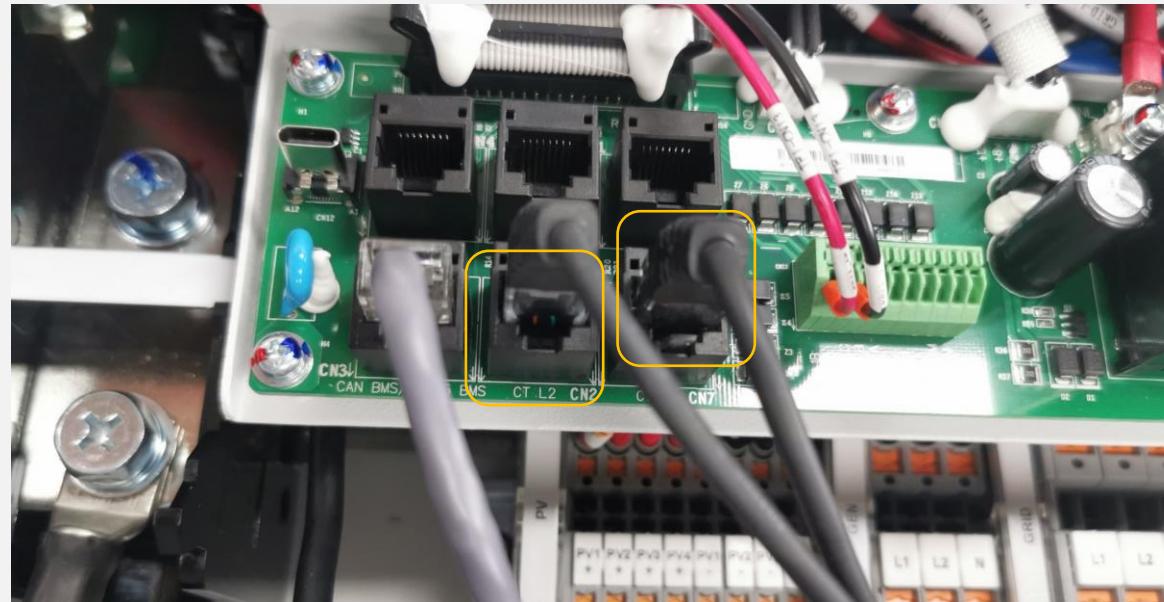

The battery communication can only work when the battery BMS is compatible with the inverter.

When using RS485 protocol, please note that PIN2 must be disconnected!

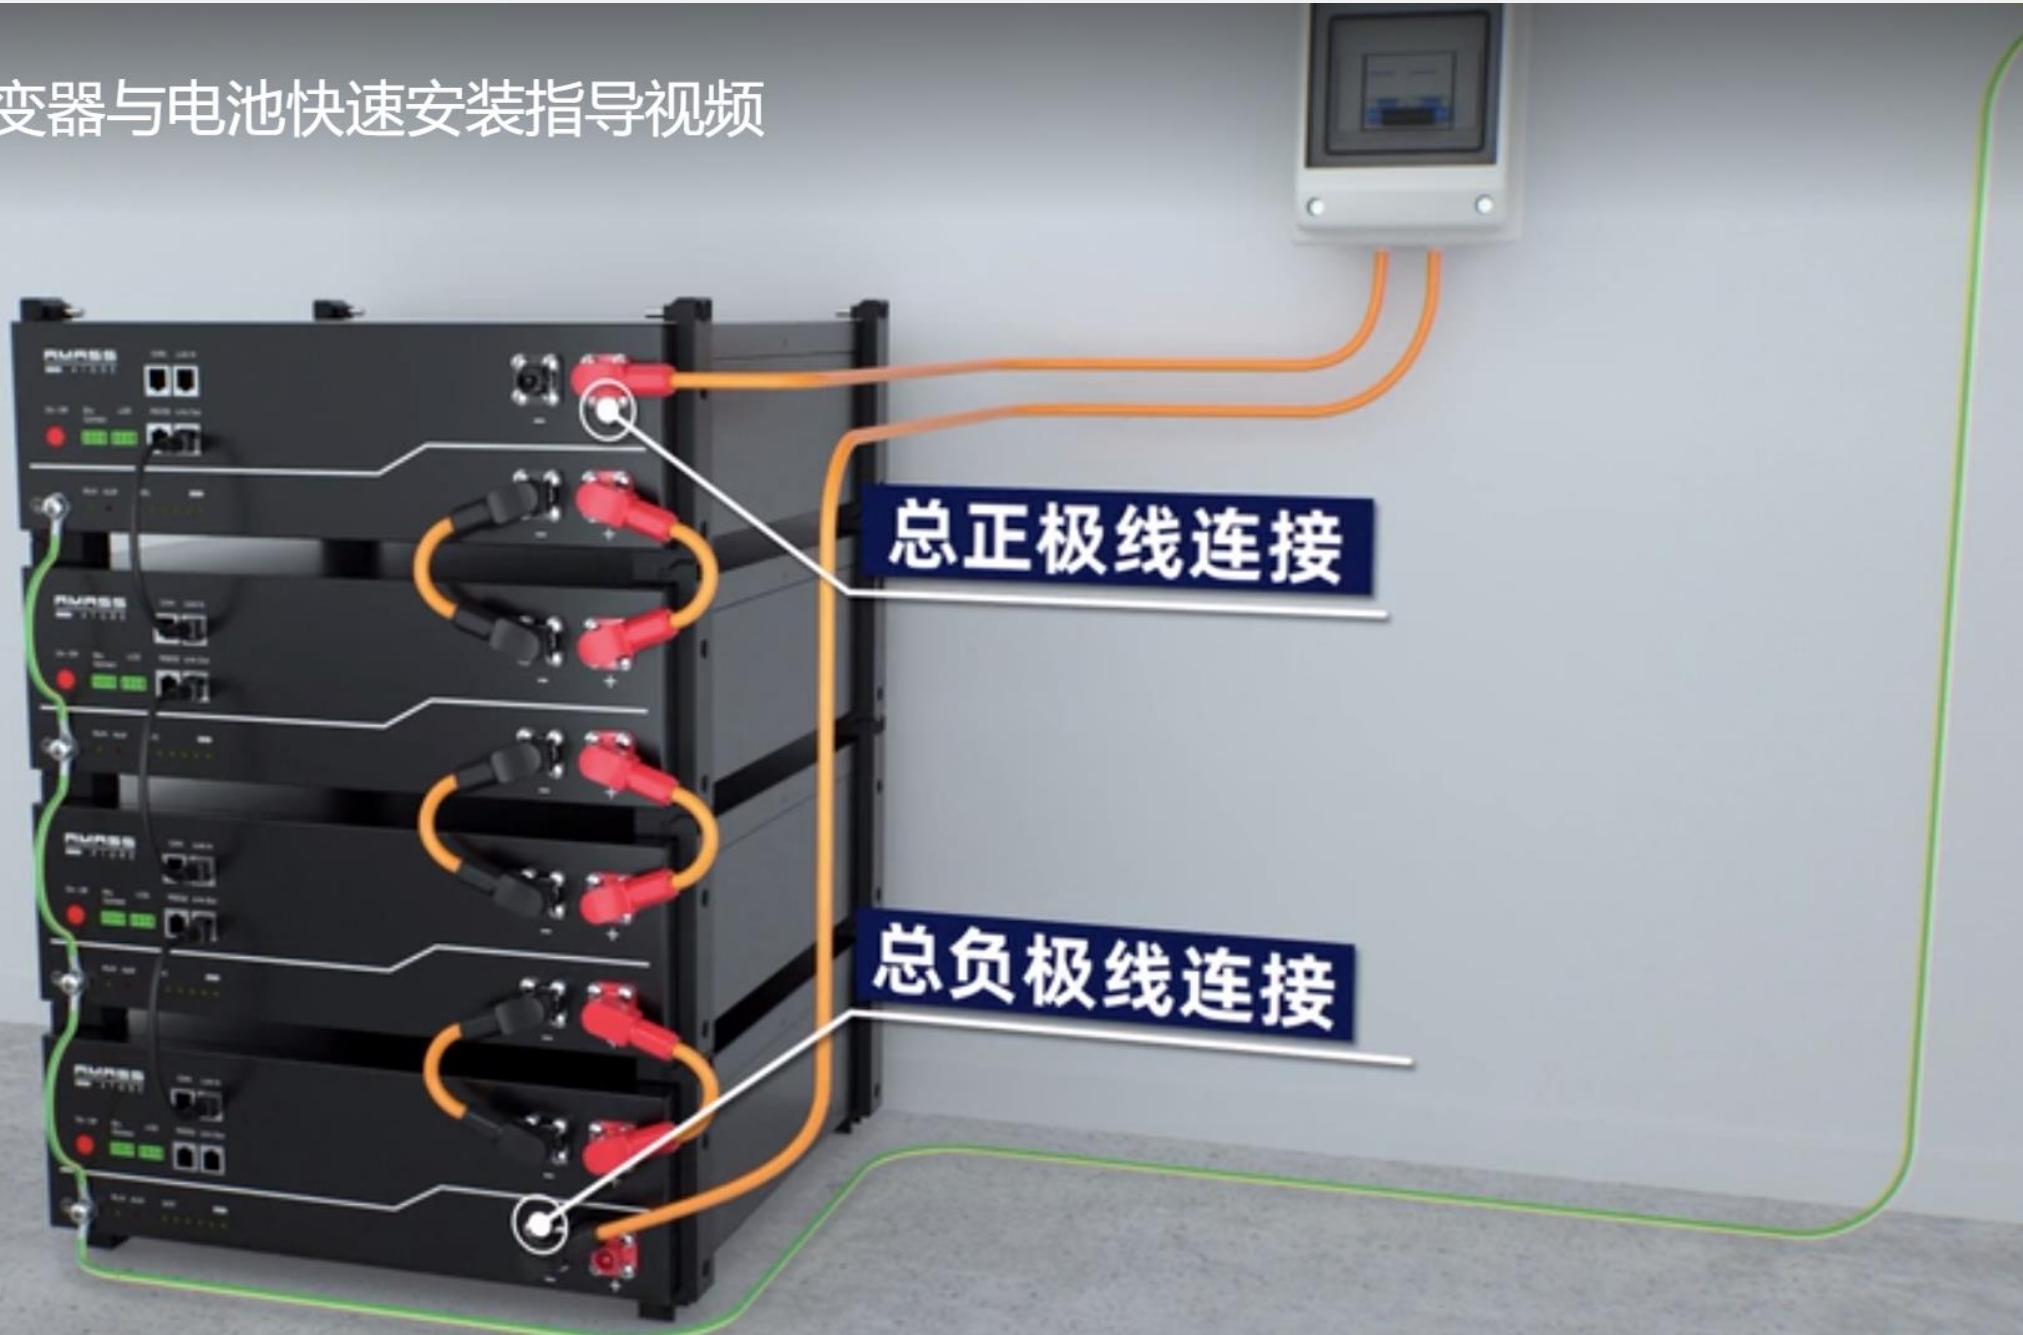

This step is not required for lead-acid batteries!

Step7:连接CT线缆检测并网电流

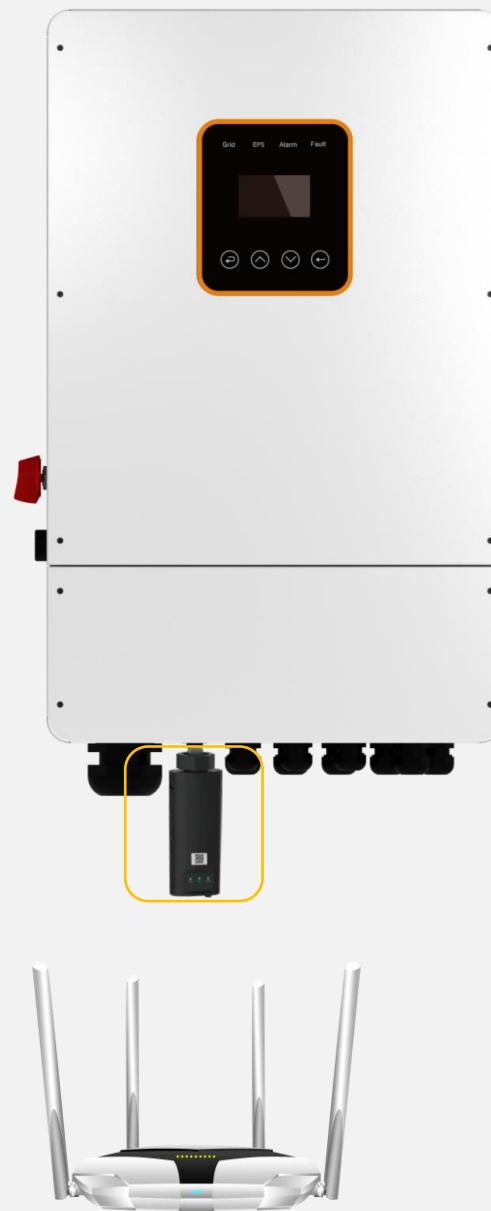

首航新能源储能逆变器与电池快速安装指导视频

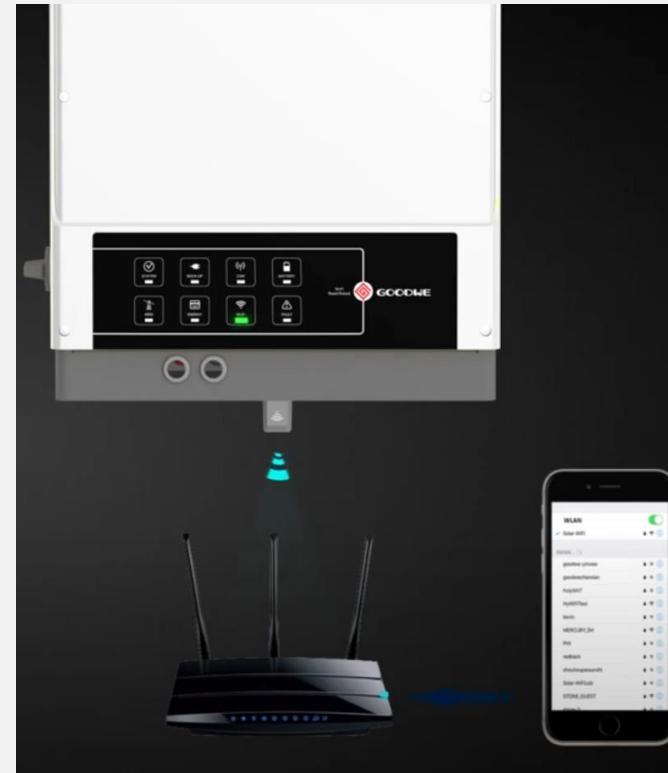

8

Network Connection

WiFi Connection (optional) step

- Step1. Plug WiFi into “WiFi” port at the bottom of the inverter.
- Step2. Build the connection between the inverter and router.
- Step3. Create a user account online.(Please check the WiFi user manual for more details).

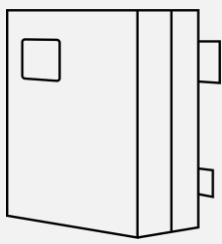

GPRS Connection (optional) steps

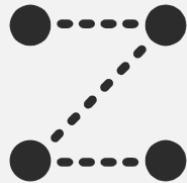

Hybrid inverter provides a GPRS(radio frequency) interface which control the switch time of a designated load via an external Smart Plug

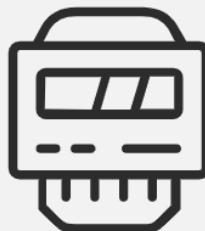

Start the inverter after checking all the following steps

1

2

3

4

5

Ensure that the inverter is firmly fixed to the wall.

Ensure that all DC and AC lines are connected

Ensure that the instrument is well connected

Make sure the battery is well connected

Turn on the photovoltaic switch and battery switch.

9

System settings

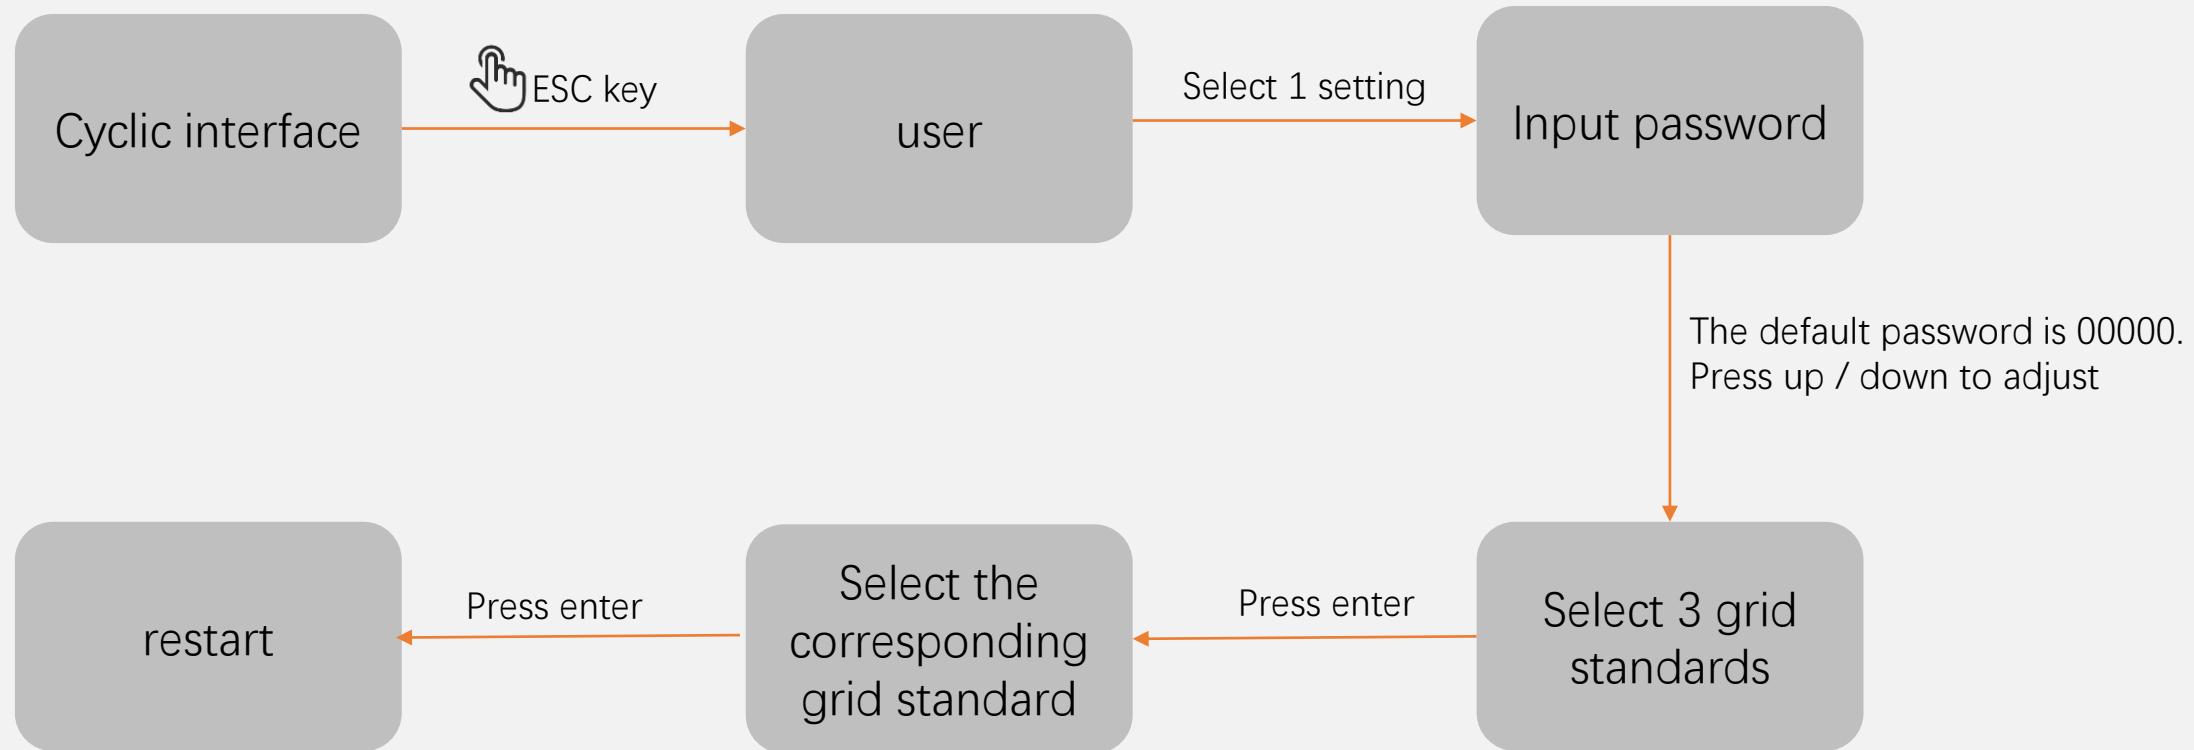

control panel 该页面采用3D动画展示，不在PPT中做动画，效果不好

LED indicator status description

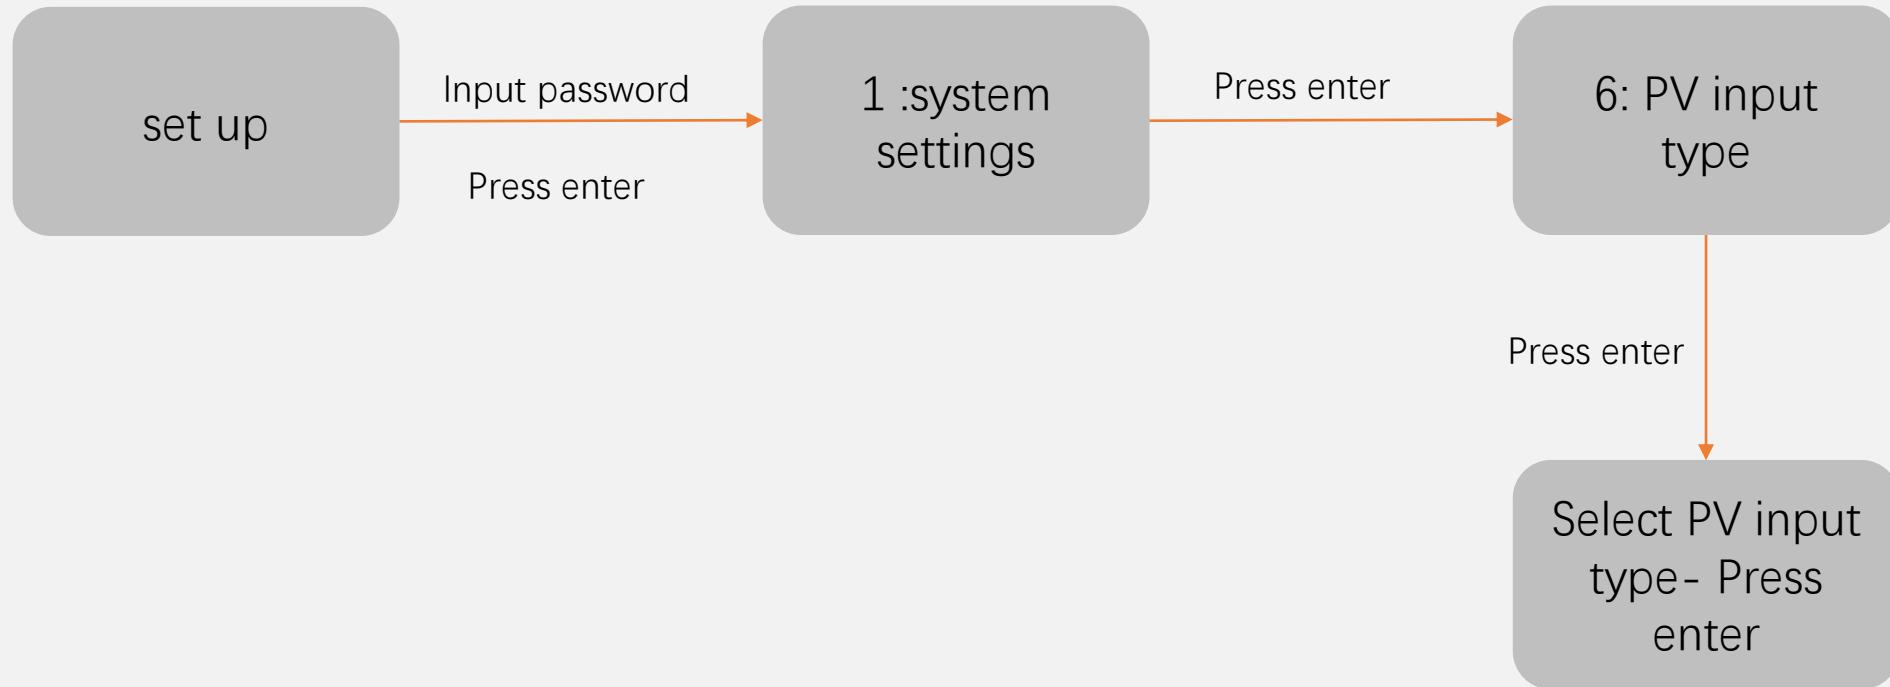

Equipment status	Grid (green)	EPS (green)	Alarm (yellow)	Fault (red)
initialization	Extinguish	Extinguish	Extinguish	Extinguish
Standby	Extinguish	Extinguish	Extinguish	Extinguish
ON-grid	Light up	Extinguish	Extinguish	Extinguish
Off-grid	Extinguish	Light up	Extinguish	Extinguish
bypass	Extinguish	Light up	Light up	Extinguish
Fault	Extinguish	Extinguish	Extinguish	Light up

Quick setup Guide 实拍

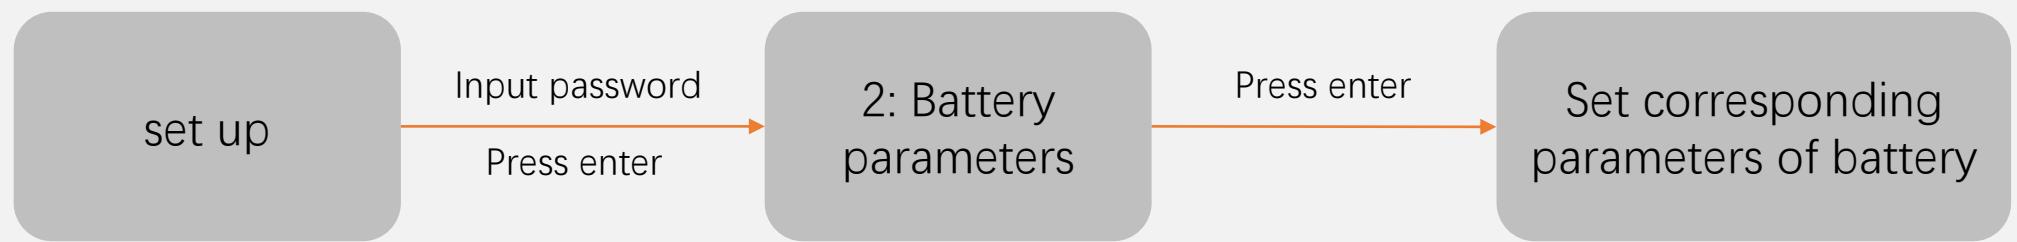

First, set the corresponding grid standard

Quick setup Guide 实拍

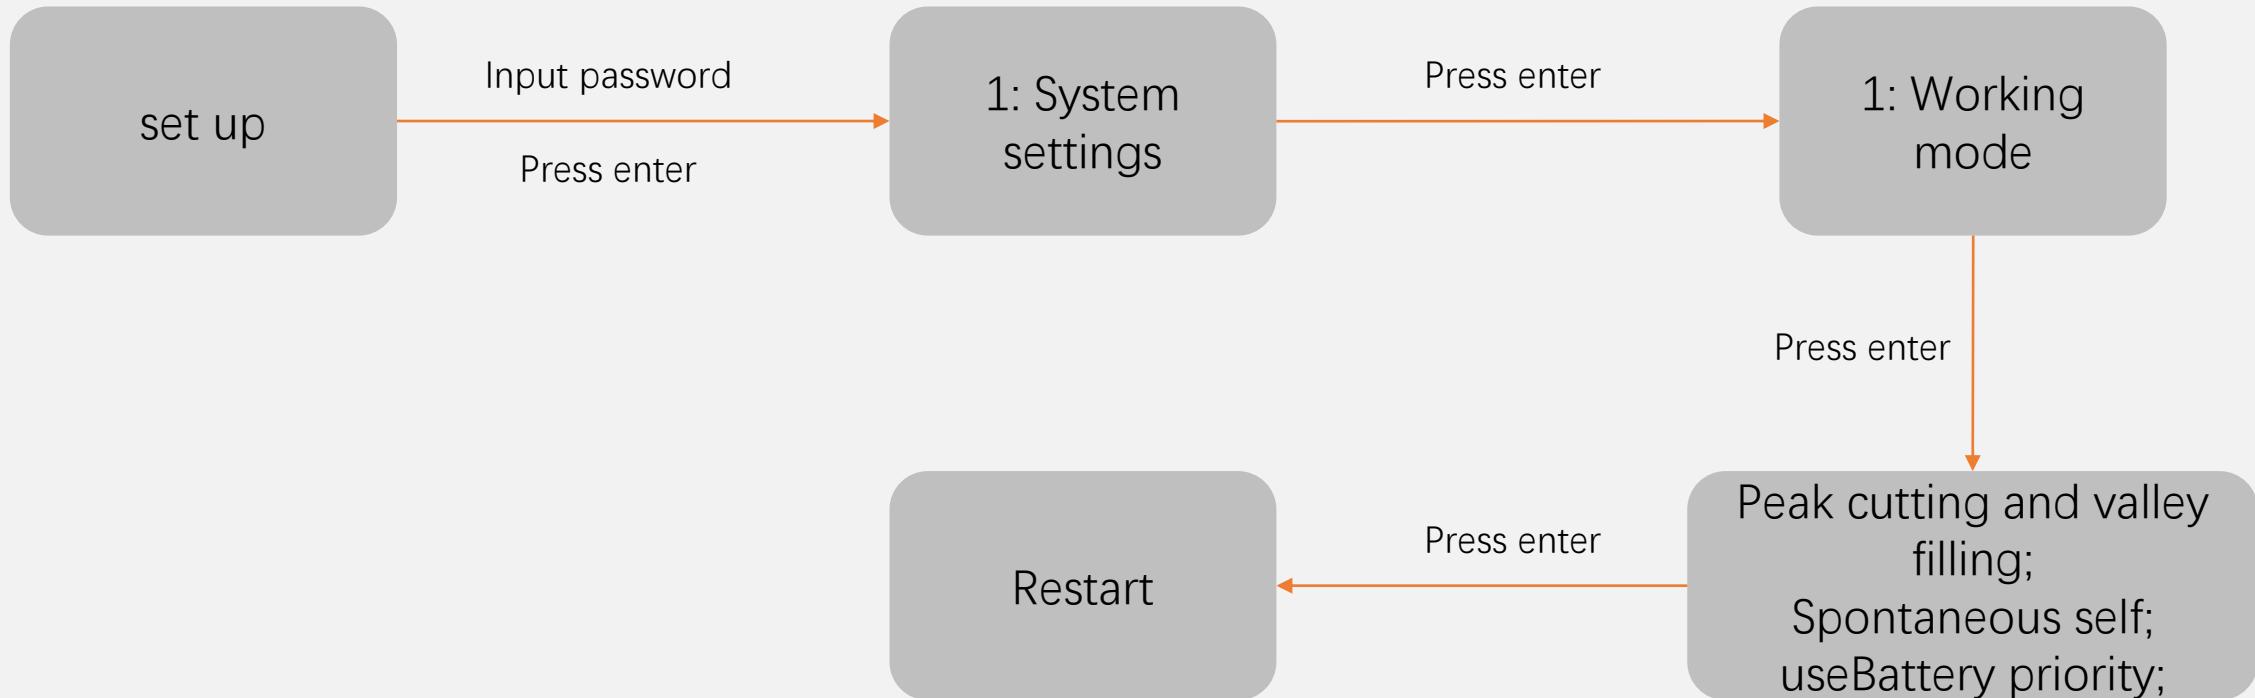

Next, Set PV input type

Quick setup Guide 实拍

Next, Set battery parameters

Quick setup Guide 实拍

Finally, set the system operation mode, 其他运行模式, 详情请参照产品用户手册。

Finally, After setting up, the system starts to work, bringing you economical and clean energyt the system operation mode,

最终回归住在全景，给一个光伏和储能给家庭负载供电的近景镜头，然后转向家庭人员正在享受负荷全景镜头（比如开空调，看电视，在家办公，给汽车充电等）。

MAKEING ENERGY CLEANER AND MORE EFFICIENT
